

Exhaust Stacks - Fiberglass Stacks:

Both highly resistant to corrosion and durable, our fiberglass stacks are designed and fabricated to fit your individual needs. If your project requires a turnkey approach, the experienced team at Palmer is ready to provide the solution. We can utilize fire-retardant resin systems and our stacks can be fabricated in slip joint, butt joint or flanged sections.

Considerations:

- Strakes
- Inspection ports
- Transitions
- Ladders and platforms
- Baffling
- Guy rings and wires
