

## Sewage Treatment - Fiberglass Lift Basins:

Palmer offers fiberglass lift basins in various sizes and configurations per the customer's specifications. These lift basins are corrosion-resistant to water, sewage, and most chemical and weather conditions. In many applications, a lift basin can be a temporary or permanent route to providing a pumping solution.

Palmer manufactures lift basins in diameters up to 15'-6" and any height necessary to fit your application. Lift basins are provided with flanged tops, cored bottoms, reinforcing ribs for buried service and anti-flotation rings on the lower sidewalls. Corrosion Resistant pump mounting brackets laminated into the floor and piping sleeves are also features that can be custom installed to suit your requirements.
